## SUMMARY

I am a BS Information Technology student with hands-on experience in programming and web development, focusing on front-end. I value teamwork, adaptability, and clear communication to ensure success in collaborative efforts. I'm eager to apply my skills and contribute to the company's success while continuing to grow professionally.

---

## PROJECT EXPERIENCE

### InvestTrack Project

Front-end Developer (Capstone 1 & 2)

- Developed front-end features and resolved issues using ReactJS.
- Created and updated the Software Requirements Specification (SRS) and Software Design Document (SDD).
- Tested the application to identify and resolve bugs and errors.

### Pet Society App

Full Stack Developer (App Dev)

- Developed front-end components and features using ReactJS.
  - Built back-end functionalities with Spring Boot, applying object-oriented programming (OOP) principles.
  - Designed and implemented the login page, About Us page, and User Profile page, including full CRUD operations.
-
